NEXOVA
INTERNATIONAL

MANUFACTURING AND EXPORTING TEXTILES

Company Profile

Nexova International is a founder-led home textile manufacturer and exporter in Karur, Tamil Nadu, India — one of the world's largest home textile export clusters. We make home textiles to each buyer's own specification, and we control every step of the making ourselves.

Who we are

A young company built on an old foundation. The founding family has worked in textiles for more than thirty years, across manufacturing, production planning, quality management and product development. The founder, Kavinsankar M, is an engineer (B.E. Mechanical) with an MBA in International Business and Leadership, and grew up inside that work.

What we make

7 categories of home textiles, each made to your design, size, material and finish (OEM and private label):

- Baby Textiles
- Garden & Outdoor Living
- Table Linen
- Utilities
- Cushions
- Kitchen Linen
- Bed Linen

How we make it — all 11 steps in-house

We do not outsource the hard parts. Running the whole process under one roof in Karur means one accountable partner, fewer quality handoffs, and faster, more reliable sampling:

Design · Dyeing · Sampling · Weaving · Printing · Embroidery · Cutting · Stitching · Checking · Ironing · Packing

Export and terms

Markets: we manufacture for international buyers; our first export order shipped to Belgium.

Shipping: FOB, CIF, CFR, EXW from Tuticorin and Chennai. We handle export documentation and plan production around your delivery dates.

Quality & compliance: every order is inspected before it ships. We can support REACH for the EU, US labeling, and CPSIA lab test reports for baby items on request. Recognized certifications are on our roadmap.
